Modern Construction Systems Sp. z o.o.

Municipal Stadium Miejski

Project:	Stadium for the European Football Championship 2012
Location:	Poznan, Poland
Material:	VALMEX® FR 1400 MEHATOP® F1 Type IV
Color:	White
Quantity:	52,000 sqm
Concept & Design:	Wojciech Ryżyński
Execution:	Modern Construction Systems Sp. z.o.o. Poland
Completion:	September 2010

Due to the high use of white translucent fabrics...

...the stadium glows at night and gives the material an impressive look by daylight. The project was a redevelopment of the existing stadium as a ground breaking tensile structure. Roof and façade structures merge to a homogenous whole.

The stadium was designed by Modern Construction Systems Sp. z.o.o Poland for the European Football Championship 2012. The stadium has a capacity of 42,837 people (all-seated). The seating areas are totally covered by 52,000 sqm perfectly tensed membranes.
