

Case study Textile Architecture

Safari Island Resort, Maldives

VALMEX® FR 1000 MEHATOP® F Type III

Design, Concept & Execution:
Skyspan™ Shade

Under one umbrella ...

... in paradise. Building this spectacular floating structure on a remote island of approximately one acre in size provided some

amazing challenges. The final result shows a dreamworld for anybody having marriage in mind.

Project:	Safari Island Resort
Location:	Mushimas Migili Reef, Maldives
Material:	VALMEX® FR 1000 MEHATOP® F Type III
Colour:	White
Quantity:	6,000 sqm
Concept, Design & Execution:	Skyspan™ Shade
Completion:	2013

The brilliant White ...

... of the tensioned roof structure builds a beautiful contrast to the ocean's blue. The footbridge leading to the canopy seems like the literal bridge to heaven.

Nonetheless the material has to withstand both mechanical and physical heavy duties: knowing that the wind not always blows as a subtle breeze for newly wed's and concerning the salty air at this beach location.

It's Mehler's VALMEX® FR 1000 MEHATOP® F Type III which suits these circumstances in order to give a presentable setting for many Maldives weddings.
