ILLUZIA

- Project:** Air supported structure for the event market
Material: VALMEX® TF attractive cristal FR
Colour: 005905 Black
Quantity: 1,050 sqm
Design, Concept and Manufacturer: Verteco Ltd., Moscow/Russia
Architect: Vladimir Ermolov
Location: In a galaxy not far away
Completion: November 2019

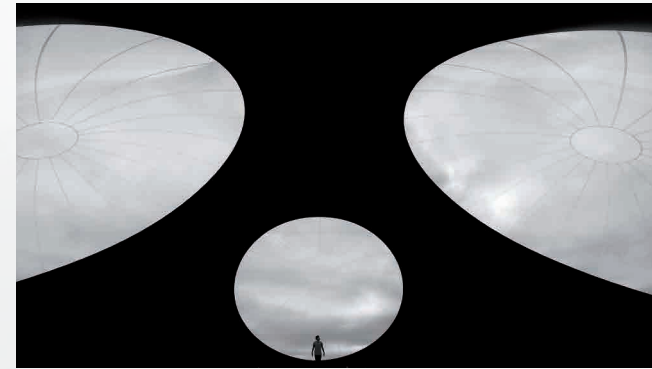

ILLUZIA is an innovative air supported structure for the event market. Its futuristic shape turns this sphere into an eye-catcher.

The ventilation always works inside the ILLUZIA, that's why the air is constantly fresh. There is no greenhouse effect because of the special floor blocking any ground vapours.

ILLUZIA can be designed into almost any shapes and sizes. It is manufactured for direct use at the location. It is easy to load, to transport and to install in any place of the world with minimal efforts - not using foundation and any complicated mechanisms.

Currently ILLUZIA is one of the fastest objects for events to build up. Just one hour to get seven hundred square meters of cool space, protected from wind, snow and rainfall.
