**Color:** Pepper

**Quantity:** 500 sqm / pod

**Architect/Designer:** Boon Architects

**Engineering:** Nagel Consultants Ltd

**Fabricator:** Fabric Structures

**Completion:** 2020

## The Green School campus ...

... is a collaborative design developed by international and local designers, architects and engineers.

It has been designed from the most organic materials available, in order to function sustainably, and provide students with a shelter nestled amongst nature where they can have a safe and comfortable environment to learn and focus.

Curved shapes are predominant in the architecture to create an atmosphere that supports alternative thinking.

The learning pods are built with the lightest materials available and surrounded by native plants in what is an inspirational environment for the students to think openly and creatively, while enjoying all aspects of the exquisite outdoor setting.
