Self Supporting Ponds

- Project:** Open flexible container. It has an upper flotation band that allows it to be supported without a rigid structure as it fills.
- Location:** Manufactured in Chile to supply Latin American region
- Material:** VALMEX® enviro pro – Big Bag II
- Color:** Green
- Total quantity:** 36 sqm
- Material:** POLYMAR® Pralltuch IV DLG
- Color:** Yellow
- Total quantity:** 43 sqm
- Concept & Design:** Tarpulin Ingeniería de Protección®
- Country:** Chile
- Completion:** Product on catalog for immediate sale

These Self Supporting Ponds provides a great solution to different needs such as: Rainwater & Irrigation water storage, Water reserve for fire control, Water supply in construction sites, Water supply in mining drilling operations. Due to its quick deployment and entry into operation, that also can be folded and rolled up without affecting its fabric, makes them easy to transport and store requiring minimal maintenance.
