POLYMAR[®] traffic Side Curtain

FACCHINI

Concept & Design:
Facchini S/A, Brazil

Truck Side Curtains Sider Van Semi-Trailer

- Project:** Curtainsider semi-trailers can be used for any cargo that requires protection from the weather during transport - as long as they can be loaded from the side or the rear.
- Location:** There are 10 factories within the country that operate in the manufacturing of distinct and integrated lines, always looking for innovations and technical solutions
- Material:** POLYMAR® traffic Side Curtain
- Color:** Wide range of colors and printed designs
- Concept & Design:** Facchini S/A
- Country:** Brazil
- Completion:** Product on catalog for immediate sale

A family company and founded in 1950, Facchini develops, produces and distributes road implements for all segments of transport with quality, in the heavy, medium and light categories, aiming at the satisfaction of its customers, sparing no efforts to meet the specified technical requirements.

One of Facchini's most successful products is the **Side Curtain Semi Trailer**, or **Lonate Trailers**, which have a rigid structure

mounted on a table trailer or flatbed. Products that fit this mold include, but are not limited to, many palletized commodities, raw materials (such as wood, steel and iron), and moisture-sensitive machinery. In addition, because these semi-trailers provide such great protection, traditional dry van goods such as food and beverage freight, general retail merchandise, and hospitality industry items (to name a few) are also transported on them.
